

Use AI Companion to generate and organize content in Zoom Whiteboard

Get help with brainstorming and get AI Companion to provide ideas to get you and your team started. Generate ideas, refine or extend existing content, and add objects to your canvas in a single click.

What you can generate

At the left-hand toolbar, click the AI Companion icon  to generate:

- ✓ **Sticky notes:** Start brainstorming by having AI Companion generate color-coordinated notes, generate more ideas, and categorize brainstorms.
- ✓ **Flow chart:** Let AI Companion speed up your workflow by automatically generating a flow chart from a simple prompt, which can be extended, simplified, and customized.
- ✓ **Mind maps:** Start a mind map with a prompt. Expand or simplify the results with a single click.
- ✓ **Tables:** Create and populate a table from a simple query, and effortlessly add recommended columns and rows with relevant information.

Best practices

Examples of prompts you could use:

- Brainstorming a new mindmap: "List the top (#) challenges faced by (_____ size) companies in the (Industry) regarding (competition, pricing, sales, new business, etc...)"
- Create a flow chart: "Visualize a process to process customer escalations."
- Populate a table: "Create a table of the top fintech companies with key information such as market strengths and weaknesses."
- Acceleration ideation with notes: "List 20 ideas to reach more customers with our online marketing campaign."

Content generation in Zoom Whiteboard is currently only available in English, and isn't available in all countries.
